

TASTE ISRAEL

A World of Flavors

As we walked the aisles of the recent Fancy Food Show, we were delighted to discover many wonderful new foods and beverages from Israel. We felt so at home and excited to taste and enjoy the myriad of foods now being produced throughout the country. So readers, in addition to technology, medical breakthroughs and forward thinking scientists, Israel is heading to the forefront of kosher food and wine. Do ask your grocer or supermarket to consider carrying some of these products!

Some of our favorites:

Shelley Anne: Shelley Anne produces whole grain crackers from only whole grains and seeds. They are 100% natural, high in dietary fiber, low in saturated fat, contain no added sugar, no preservatives, no additives, and are a good source of many nutrients. In addition to crackers, products include a variety savory snacks such as Bread Rings and Bagel Sticks- oven baked with only a few ingredients using a traditional recipe.
